

# Evalam Visual

The only EVA with better  
properties than PVB

# Evalam Visual

## Nine good reasons to choose Evalam Visual

### 1. Unbeatable transparency

Suited for use with extra clear glass for balustrades, curved glass, greenhouses, canopies, or stairs. In addition, is an EVA product suitable for all applications requiring a high interlayer thickness.

### 2. Crosslink higher than 87%

Ensures that glass laminated with Evalam EVA will have a durability and stability that is far superior to any other thermoplastic material.

### 3. Open edge resistance

Evalam Visual is an EVA product developed for long-lasting resistance to humidity. It also resists delamination arising from unfavourable weather conditions or high-humidity/high temperature environments.

### 4. UV filtering

Offers protection against the aggressive effects of the sun's ultraviolet rays which causes fading of furniture, wooden floors, fabric, plastic as well as being harmful to people on the other side of the glass.

### 5. Adhesion higher than 140 N/cm

Adhesive strength is greater than 140 N/cm, ensuring that, under normal environmental conditions, the physical, chemical, and mechanical properties of the glass won't be altered.

### 6. Great acoustic insulation

High noise reduction, a quality not offered by other standard thermoplastics. This feature provides greater comfort, minimising those stressful situations associated to noisy environments.

### 7. Protection for people and property

Evalam Visual protects people and property behind the laminated glass composition. Our testing processes take into account all the areas covered by the standard for pendulum impact testing. We also conduct ball drop tests to assess glass behaviour in forced entry and impact situations.

### 8. Lateral and vertical load resistance

Evalam Visual has earned the maximum shear modulus classification, making it the perfect interlayer to ensure stability and withstand wind and snow loads on façades and canopies.

### 9. Fire resistant

We've obtained certification for Evalam Visual's resistance to fire and high temperatures.

## Furthermore, there many Evalam advantages

#### GROUP

Evalam is a brand belonging to Pujol Group; leader in the glass sector.

#### GUARANTEE

Experience supported by a 1.2M€ civil liability policy.

#### KNOW HOW / SERVICE

We have our own engineering, technical and development departments at the service of the customer.

#### QUALITY

ISO certifications and quality controls made in our factory in Galicia (Spain).

#### CERTIFICATES

Our products have more than 70 certificates granted by external laboratories.

#### PRODUCT RANGE

We have a wide variety of architectural solutions.

#### SUCCESS STORIES

Day by day, Evalam is the solution chosen for the laminated glasses for large projects.
