Company presentation

Description

More than 25 years, Folienwerk Wolfen GmbH manufactures and supplies high quality plastic films like PET, special polyesters and bio-based materials.

The company was founded by employees of the traditional Filmfabrik ORWO. Folienwerk Wolfen GmbH is also internationally known for the specific production of films for blister packages and smart cards as well as for films for medical devices. From our location in Bitterfeld-Wolfen, near Leipzig, we deliver to customers in more than 60 countries all over our blue planet.

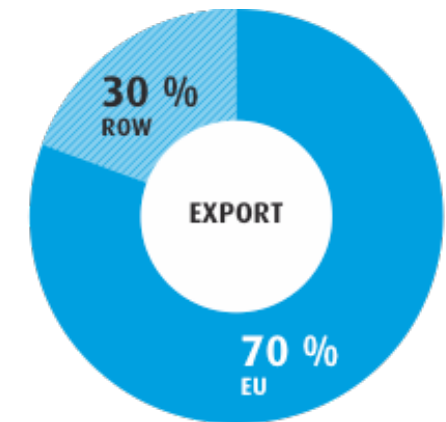

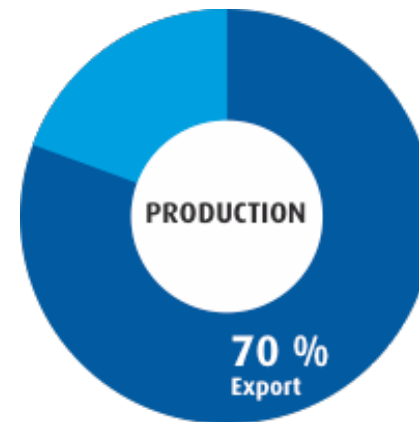

This portfolio is completed by films on ethylene vinyl acetate (EVA). With the **evguard**® series, we have created an innovative product with diverse design and processing options in façade engineering and glass design.

Facts
